(54) Title: A METHOD FOR ESTABLISHING A CONNECTION BETWEEN A MOBILE DEVICE AND A SECOND DEVICE

(57) Abstract: The present invention relates to a method for establishing a connection from a mobile device (10) to a second device (20) both provided with a short range wireless communications module (11, 21). To reduce the set-up time for establishing such a connection significantly the method according to the present invention comprises the steps of: - determining the present environment of the mobile device (10), - determining an address (DAC) of the second device in dependence on the present environment of the mobile device (10), and setting up the connection to the second device (20) using the address (DAC) determined in the previous step.
